Education

The University of Texas at El Paso Bachelor of Science in Computer Science GPA: 3.63/4.00	El Paso, TX Expected December 2027
--	---------------------------------------

Skills & Relevant Coursework

Programming Languages: Python, Java, C, C++, JavaScript, SQL, HTML/CSS
Frameworks & Technologies: React, Node.js, Express.js, Flask, Streamlit, Pandas, REST APIs, Supabase, OpenAI API, Google Generative AI
Developer Tools: Git, GitHub, VS Code, JUnit 5, Excel/XLSX
Relevant Coursework: Data Structures & Algorithms, Advanced Object-Oriented Programming, Database Systems, Programming Language Concepts, Automata & Computability, Computer Organization, Digital Systems Design, Discrete Mathematics, Probability & Statistics, Matrix Algebra, Calculus I–III

Work Experience

Undergraduate Assistant – Learning Environments – Collaborate with students, faculty, and staff to support and improve learning environments. – Research and implement emerging technologies to enhance teaching and learning spaces. – Contribute to projects that redesign learning spaces to promote creativity and innovation.	Oct. 2025 – Present
Team Leader – Computer Science Tech Team – Led a team of 5 undergraduate assistants, delegating tasks and meeting deadlines. – Improved efficiency by creating workflow documentation and promoting best practices. – Provided technical support to faculty and staff across hardware, software, and network issues. – Ran weekly team meetings to set goals and improve collaboration. – Trained and mentored new staff in technical and customer service skills.	Sept. 2024 – Aug. 2025

Projects

AI Hackathon Stock Trading Simulator <i>Node.js, Express, React, XLSX, REST APIs</i> – Built backend execution engine for a gamified stock-trading simulator teaching financial literacy. – Developed REST APIs for trade execution, balance tracking, portfolio valuation, and price lookup. – Processed Excel datasets to generate clean time-series market data for the UI. – Implemented persistent portfolio state using JSON for equity, cash, holdings, and history. – Created a React dashboard with real-time portfolio metrics and interactive charts using Recharts.	Oct. 2025
RFI Generator & Economic Impact Simulator <i>Flask, Supabase, OpenAI API, Streamlit</i> – Built a full-stack app to generate professional RFI reports and economic impact simulations. – Integrated OpenAI API for intelligent, context-aware document generation. – Connected to Supabase to retrieve live data and ensure report accuracy. – Designed intuitive UI to improve usability and user experience.	Mar. 2025
AI Resume Parser <i>Flask, NLP, Pandas, HTML, CSS</i> – Built a full-stack app that parses resumes and generates automated scores with personalized feedback. – Used Pandas and NLP to match candidate skills with job requirements and benchmarks.	Jan. 2025
Eloy’s Study Hub <i>Python, Streamlit, Google Generative AI, PyPDF2</i> – Built an interactive study platform with Streamlit, Google Generative AI, and an AI PDF reader. – Developed a scientific calculator using Python’s math module. – Enabled AI-generated flashcards and quizzes from uploaded PDFs.	Sept. 2024

Leadership & Activities

Association for Computing Machinery (ACM) – Secretary – Record and distribute meeting minutes to maintain clear communication and records. – Manage official communications, including newsletters and event announcements. – Maintain the chapter calendar, schedule meetings and events, and manage the member roster.	Aug. 2025 – Present
Association for Computing Machinery (ACM) – Management Chair – Managed logistics for events including hackathons, datathons, CTFs, and workshops. – Coordinated end-to-end event planning including venues, schedules, and resources.	Jan. 2025 – Aug. 2025
Coding Interview Club (CIC) – Member	Jan. 2024 – Present
Google Developer Group (GDG) – Member	Aug. 2025 – Present
